City Scrap Metal Inc. reserves the right to accept or reject any and all metal. The final grading of all material will be determined by City Scrap Metal's ticket writers. Please review your ticket and ask any questions before you leave. We are happy to answer any and all questions.

Copper

- **Bare Bright, BB** Shall consist of No. 1 bare wire, uncoated, unalloyed copper wire, not burnt, not tarnished, not smaller than No. 16 B & S wire gauge. Must be bright and shiny copper wire.
- **#1 Copper** Shall consist of clean wire or tubing, untinned, uncoated, unalloyed copper wire and cable, not smaller than No. 16 B & S wire gauge, free of burnt wire which is brittle. Shall consist of clean, unalloyed, uncoated copper clippings, punchings, bus bars, commutator segments, and wire not less than 1/16 of an inch thick, free of burnt wire which is brittle; includes clean copper tubing.
- **#2 Copper** Shall consist of miscellaneous, unalloyed copper wire or tubing having a nominal 96% copper content (minimum 94%) as determined by electrolytic assay. Should be free of the following: Excessively leaded, excessively tinned, excessively soldered copper wire or tubing; brass and bronze wire; excessive oil content, iron, and non-metallics; copper wire from burning, containing insulation; hair wire; burnt wire which is brittle; and should be reasonably free of ash.
- **Sheet Copper** Shall consist of miscellaneous, unalloyed copper scrap having a nominal 92% copper content (minimum 88%) as determined by electrolytic assay and shall consist of sheet copper, gutters, downspouts, kettles, boilers, and similar scrap. Should be free of the following: Burnt hair wire; copper clad; plating racks; grindings; copper wire from burning, containing insulation; radiators and fire extinguishers; refrigerator units; electrotpe shells; screening; excessively leaded, tinned, soldered scrap; brasses and bronzes; excessive oil, iron and non-metallics; and should be reasonably free of ash.
